

26cm Casserole Dish
CKFC2611

FEATURES

- Suitable for all cooktop surfaces
- Oven safe: up to 250 °C
- Dishwasher safe
- Internal PTFE non-stick coating
- Cold forged aluminium body
- Stainless steel base
- Riveted handle

5 Year warranty

PRODUCT HIGHLIGHTS

MADE IN ITALY STYLE

Smeg introduces its first ever cookware collection designed by Milan studio deepdesign and entirely Made in Italy available in cream, red and black. The curves and metal details of the iconic FAB28 fridge and small appliances have inspired the new range which consists of frying pans, a casserole dish and a wok all with a contemporary and functional design. The extension into cookware is a natural choice and this range is the result of Smeg's extensive cooking heritage.

OVEN SAFE

The entire cookware range can be used in the oven up to 250°C thanks to the hard-wearing, durable, and high temperature compatible stainless-steel riveted handles. The aluminium body ensures even heat distribution across the entire surface – preventing the formation of hot spots, where food may burn.

WORKS ON ALL COOKTOPS

Thanks to the patented base, the Smeg cookware range is compatible with gas, induction, ceramic and electric cooktops. The durable stainless steel handles, combined with tempered glass lids makes these ideal to monitor cooking progress. From boiling beautiful, fresh pasta to rapid, stir-fry cooking, Smeg cookware has a solution for a variety of cooking styles.

ECO SAFE NON-STICK

The non-stick coating allows food to brown without sticking to the pan and reduces the need to use additional oils and fats. The surface is resistant to high temperatures making it suitable for all methods of cooking and is easy to clean along with being dishwasher safe.
