

P1641XA

Smeg 60cm gas cooktop

Flame Failure (FFD)

A flame failure device, FFD, with rapid ignition is fitted to each burner. The FFD ensures that should a flame be extinguished accidentally — the gas supply to the specific burner(s) is stopped. For absolute safety, the burner(s) can only be reignited by physically resetting the control knob(s) to the OFF position and then following normal ignition procedure.

Ultra Rapid Burner

This large and versatile burner suits the larger woks, stock pots, boilers, saucepans and griddles. A wok stand is supplied for easy fitting on the trivets for stir-fry cooking.

EAN	8017709152062
Dimensions	600mmW x 510mmD x 40mmH
Finish	Stainless Steel
Installation	Topmount
Capacity	4 Burner Left - 15.0 mj/hr Front center - 4.8 mj/hr Rear center - 6.0 mj/hr Right - 11.5 mj/hr
